There is a rise in the amount of crime in our country and most people are unaware of the criminal laws under IPC (Indian Penal Code). Therefore it becomes necessary to make the citizens aware of all kinds of laws put forth by our constitution against crime so that people come forward to register cases against it. This project is executed especially for this purpose.

In this project, we provide all the official details of lawyers. In this, we list the details of all the lawyers in the district, display their ratings, how many cases they have won, how to get their appointments, and their charges. The rating of advocates is given based on the controversial cases

If a person logins to this site, he would get information about what all types of advocates are there. He can sort advocates based on their rating, their cases, or fees charged by him. Also, a person can chat with the lawyer. In this, we have included a special feature that allows any person can view all the IPC sections and check whether the case filed against them is genuine or not

The project approximately includes 6 modules. That is login, different types of advocates, sorting according to the user's choice, and then displaying the details, taking appointments, and additional information.
